Corporate Overview

Founded in 1973, BBL is a fully diversified Design-Build, General Contractor, and Construction Management firm with annual construction sales in excess of \$400 million. BBL is a leader in the construction industry, ranking among the nation's Top 400 Contractors in ENR (Engineering News Record) magazine.

BBL currently employs over 300 highly talented and experienced construction, design, and management professionals. Our knowledge and expertise ensures that proper design and construction solutions are used on each of our projects. Our delivery process saves our clients time and money, while assuring them they will receive a high quality, successful project that will support their desired business goals.

We deliver a wide variety of construction projects including healthcare, hospitality, financial institutions, multifamily, commercial office, higher education, government, retail, and industrial projects.

With over four decades of experience, BBL has built a reputation as an industry leader. Our history of success is a result of our solid commitment to quality and an established record of delivering projects on-time and in-budget. Whether it's from our corporate office in Albany, New York or our regional office in Charleston, West Virginia, all our clients receive the same professional service and high-quality construction.

INDUSTRIAL EXPERIENCE

Architectural Glass & Mirror Office and Warehouse

Clifton Park, New York

SQUARE FOOTAGE
30,000

DELIVERY METHOD
Design-Build

BBL was selected to construct the 30,000 sf one-story office and warehouse building and associated sitework and site improvements. The building was primarily constructed of structural steel with a glass curtain wall and 4" thick metal skinned insulated foam exterior panels along with an EPDM roof.

This project was constructed in order to house AGM's expanding business and to meet the pressing need for more warehouse and manufacturing space.

BBL assisted the Client in securing grant money from NYSERDA for high efficiency HVAC and lighting systems.

Empire Merchants and Distributors

AWARDS
LEED Silver

Empire Merchants is a State-Of-The-Art distribution facility resulting from the consolidation of two other warehouses. Designed and constructed on a fast track, the building houses a \$5 million product conveyor system and 35,000 square feet of office and training space. A defining feature of the building is the insulated precast panel cladding, which allows for a 40-foot vertical clear height inside the structure.

The project has received LEED Silver Certification from the U.S. Green Building Council.

DeCrescente Distributing Co.
Mechanicville, New York

SQUARE FOOTAGE
226,819 total

DELIVERY METHOD
Design-Build

Decrescente Distributing Company selected BBL to construct an addition, as well as, renovate their existing warehouse. The exterior wall system is constructed of insulated precast concrete wall panels. The interior fit-up included creating a 20,000 sf cooler within the existing building. The facility is the central hub of DeCrescente's operations and remained operational during all phases of construction.

BBL was later selected for an additional project which involved the construction of a new 29,463 sf, two-story Training and Wellness Center building. The steel framed building has a brick veneer façade. It houses sales offices, an exam facility, exercise room, locker rooms, a 150-seat training facility, a pub, and a kitchen.

Also included in the project was the construction of a new 22,356 sf Point of Sale and Vending Warehouse. This building consists of prefabricated, precast concrete walls, and steel bar joists. The warehouse includes racking storage, a drive through lane, and print shop.

Sysco Albany
Clifton Park, NY

SQUARE FOOTAGE
22,990

DELIVERY METHOD
Design-Build

BBL worked with Sysco Albany to create a new business review area, break room area, and modified the main office of the Sysco warehouse and distribution center. Prior to the mentioned upgrades, BBL came in and replace insulation, paint, and flooring damaged from a water break.

DeCrescente Warehouse Expansion

Mechanicville, New York

SQUARE FOOTAGE
175,000

DELIVERY METHOD
Design-Build

Decrescente Distributing Company selected BBL to construct an addition, as well as, renovate their existing warehouse. The exterior wall system is constructed of insulated precast concrete wall panels. The interior fit-up included creating a 20,000 sf cooler within the existing building. The facility is the central hub of DeCrescente's operations and remained operational during all phases of construction.

Cargill Bagging Line Addition

Albany, New York

SQUARE FOOTAGE
6,500

DELIVERY METHOD
Design-Build

When Cargill Animal Nutrition decided to add an additional bagging line assembly to their operations, it was apparent that their existing facility in the Port of Albany needed to be expanded. Cargill selected BBL to design and construct a plant addition to incorporate space for the new bagging line equipment along with a mezzanine to hold new offices that overlooked the plant floor. Under the management of BBL, the project required careful coordination between the building, bagging tower, and the bagging equipment engineering firms during the design process; and between BBL and the tower erectors during construction. The building addition now holds the \$2 million new bagging line assembly that extends 80' high into the new tower.

Taconic Farms

East Greenbush, New York

SQUARE FOOTAGE
22,000

DELIVERY METHOD
General Contractor

BBL completed the construction of the nation's most advanced biotechnology Isolation Breeder Facility for Transgenic laboratory specimens. The facility includes redundant electrical and mechanical systems, critical environmental controls, and monitoring systems to modify temperature and humidity. Air and water quality are also monitored and adjusted by systems equipment.

Atlas Copco Comptec, LLC
Voorheesville, New York

SQUARE FOOTAGE
5,000

DELIVERY METHOD
Design-Build

Construction consisted of new 2,000 sf addition to house the new blast booth , concrete foundations, steel frame with metal insulated panels, and brick veneer. Roof system was white TPO membrane. Interior finishes included paint and epoxy flooring. Other work included removal of existing concrete floor slabs and installation of new pit drains with new pitched concrete floors with epoxy coatings for the new wash and paint booths. Mechanical work included new electrical panels and feeds for the new equipment, new lighting and tie- for the fire alarm, and removal of old air handler units. Fire protection systems were added to the new addition and over the new equipment.

Sealy Mattress Company

Green Island, New York

SQUARE FOOTAGE
257,000

DELIVERY METHOD
Design-Build

Sealy Mattress selected BBL to design and build a new 257,000 SF manufacturing and distribution facility. This new state-of-the-art facility serves as Sealy's headquarters and sales center replacing their previous warehouse which was outdated and undersized.

At conception, the building was intended to be a showpiece for Sealy and is used to tour prospective clients. With this in mind, the manufacturer required specialized finishes such as a highly cleanable, dust-free concrete floor.

Amsterdam Printing

Amsterdam, New York

SQUARE FOOTAGE
100,000

DELIVERY METHOD
General Contractor

The Taylor Corporation out of Minnesota, turned to BBL for a 100,000 square foot addition to their existing manufacturing and warehouse facility in Amsterdam, N.Y. The growing company provides printing and embroidery of promotional products for businesses and needed additional space to handle the workload. The project was set to an aggressive 5-month construction schedule.

Carioto Produce

Green Island, New York

SQUARE FOOTAGE
16,000

DELIVERY METHOD
Design-Build

When Carioto Produce was looking to expand their food distribution operations, they were clear that any viable new facility would need to be extremely economical and operational quickly. They selected BBL Construction Services and Green Island. Just seventy five days after starting, their fit up was complete, and they were distributing their product. Working closely with Carioto Produce and their refrigeration contractor, this BBL design/build project became another success.

Arcadia Supply
Green Island, New York

SQUARE FOOTAGE
64,000

DELIVERY METHOD
Design-Build

Green Island Properties, LLC chose BBL Construction Services to design and build a new pre-engineered metal building with associated site improvements. The challenge with this project was limited to the schedule, for example, completing the concrete and masonry during the winter months.

One of the tenants of this facility is Arcadia Supply. A 64,000 SF fit-up inside an existing metal building. A new (2) two story office space inside (total 8,000 SF) structure consisting of heavy gauge metal stud framing, steel bar joist and 3" concrete slab-on-deck with offices, conference/training rooms, break rooms, bathrooms, and locker rooms. 60,000 SF is manufacturing area for laser cutting machines, large overhead cranes, shipping/receiving and Quality Control offices.

NYS Bar Association Print Shop

Green Island, New York

SQUARE FOOTAGE
20,000

DELIVERY METHOD
Renovation

This project included the renovation of an existing warehouse to construct a 20,000 square foot print shop. The project entailed the construction of two new offices, storage and printing/copy areas, an AV room and finishes with new electric service. The existing offices received new flooring and paint. The fire sprinkler system was redesigned to comply with the new floor plan.

Green Island Industrial Park

Green Island, New York

SQUARE FOOTAGE
791,000

DELIVERY METHOD
Design-Build

Over the past 16 years BBL, in partnership with Galesi Companies, has re-developed 60 acres of the former Ford plant to provide just under 800,000 SF of tenant space to a diverse group of companies and organizations. From legacy tenants such as NYS Tax & Finance and NYS Bar Association to successful start-ups Crystal IS and Ecovative the economic stimulus for the Village of Green Island is enormous.

Long Island Pipe Green Island, New York

SQAURE FOOTAGE
64,000

DELIVERY METHOD
G.C. Hard Bid/Lump Sum

BBL was tasked with the new construction of a 64,000 sf warehouse for Long Island Pipe Supply. The warehouse is metal with EIFS trim along the front elevation. A 17' steel bollard system was installed at the rear half of the building where piping is stored, organized and maintained. A small office area with three bathrooms was constructed at the front corner of the building. Three large 23' wide overhead doors were installed for large truck access into and through the building.

Specialty Silicone Products

Ballston Spa, New York

SQUARE FOOTAGE
19,000

DELIVERY METHOD
Design-Build

The construction of the 19,000 sf addition to Specialty Silicone Products' (SSP) facility allowed them to expand and improve the efficiency and quality of their production of silicone products for various industries including automotive, aerospace and pharmaceuticals.

SSP's facility expansion includes clean rooms and energy efficient technologies to provide a production environment to secure SSP's position as a leader in the silicone industry. BBL designed and constructed this expansion to provide SSP with the greatest flexibility and the ability to modify and expand the production area.

70 Cohoes Ave.
Green Island, New York

SQUARE FOOTAGE
88,000

DELIVERY METHOD
General Contractor

BBL Construction Services was chosen by Green Island Properties to construct a new pre-engineered metal building with associated site improvements. The most challenging part of this design/build project was, maintaining tenant fit-up schedules.
